Hydrogen peroxide-based solution cleans, disinfects, and stores contact lenses, and it's traditionally prescribed when someone has an allergy to multipurpose solutions. Hydrogen peroxide-based solutions need to be stored in a special case that transforms the liquid into saline solution, so that it doesn't burn or sting the eyes. Rigid gas permeable solution is specifically designed for hard contact lenses and tend to only store them—not to clean or disinfect them.

### **The 10 Best Contact Lens Solutions of 2020**

Hydrogen peroxide solutions (such as Clear Care by Alcon) do not contain any preservatives and

can be a good option for people with more sensitive eyes or for people who have a lot of allergies. Hydrogen peroxide solutions also do a very thorough job of breaking up proteins and deposits on the lenses during the disinfection process, and this can benefit people who tend to produce a lot of build-up on their lenses.
